

Collaborating with ROK Solution

A collaborative Intranet open to your ecosystem, supported by the Cloud, with all embedded IP communications platforms (email, chat, voice, image, conf. call)

Integrate and manage all communications tools

- Messaging: pilot and exchange index : emails, directories, alerts, synchronizations
- Chat, voice, video call and video conf. : Chatting, talking, seeing your employee and sharing with your environment are just one simple click away
- Screen sharing: you can share your terminal with your employee at any time

Have a collaborative Intranet opened to its ecosystem

Collaborative Intelligence enables a structured and intelligent agile collaboration in the company and with partners according to your position(s) in the organization and your logic system (system approach for rights and browsing).

ROK STORE:

Collective knowledge provided through ROK Apps that are downloadable and instantiable through ROK. Finish the unfinished white papers; exposed knowledge becomes executable.

Communicate intuitively without restrictions through cutting-edge technologies

ROK Solution is a Web Interface (thin client): You have access to ROK if you have internet access. The interface is totally **tactile** (PC Tablet, 3G access). Finally, it's a **Cloud solution** = agility, elasticity.
